

Solution for Multi-workstations Sites

The Cost-Effective Solution for Expanding Your PC Access

Organizations worldwide face a unique challenge: Budgets are tight, on the one hand while, on the other, the demand for computational environment keeps growing. Committed to top performance and high flexibility, SoftXpand desktop virtualization solution provides computer access for everyone while drastically reducing your TCO.

With only one host computer needed for multiple workstations, SoftXpand simplifies operating your multi workstations site, and offers a reliable computing experience.

SoftXpand offers solutions that are adapted to different types of users. Each solution is designed to provide added-value for niche-specific implementations. SoftXpand is used in many sectors, including educational institutions, banks, libraries, call centres, internet cafes, hotels and others.

What Makes SoftXpand Ideal for Your Organization?

Whether your organization is a school, library, bank, call center or government organization, SoftXpand's innovative solution is the ideal solution for your IT infrastructure. SoftXpand is dedicated to offering software-only technology that is a true replacement for hardware, and it thereby offers exclusive, unmatched benefits:

XX Reduces TCO Dramatically

With fewer computers, you can significantly reduce your initial purchase costs, minimize maintenance time and expenses, and cut down on the electricity needed to power and cool your machines.

XX Supports Your IT Environment and Decreases Maintenance Costs

Finding a way to maximize computational power is a goal many organizations have set to achieve. SoftXpand enables you to maintain only one host computer in a single location to provide multiple workstations. Hardware and software installed on the PC are shared, and upgrading involves replacing only a single computer. In fact, SoftXpand helps reduce maintenance costs significantly.

Exclusively Distributed by: UNISA TRADES ENTERPRISES, INC.

XX Offers a Simple Switch to Green IT

SoftXpand marks a new generation of Green IT. With fewer computers, you consume 75% less energy, cut down on CO₂ emissions by 80%, and reduce your e-waste by 80%. Furthermore, the manufacturing of multiple SoftXpand workstations requires a fraction of the amount of energy needed to produce the same amount of standard PCs. Join the fight for a better environment and reduce your carbon footprint with SoftXpand.

XX Ensures Robust Performance

With its unique up-and-coming virtualization technology which enables resource sharing, SoftXpand maximizes the full power capacity of each PC you own. As with a standard PC, your desktop content is protected by folder access rights, private user IDs, and customized access details. Each workstation supports standard software applications, high screen resolution, multimedia sound, full-motion video, and heavy graphic applications – all in a highly reliable, high-speed processing environment which maintains a seamless user experience.

XX Enables Maximum Flexibility and Scalability

Clever IT is about staying up-to-date with the latest technologies, while maintaining flexibility. This is even more significant in the often inflexible nature of IT infrastructures. SoftXpand offers you the best desktop virtualization solution that meets your needs today – and can grow as you grow tomorrow.

XX Facilitates Better Work Environment

It is common knowledge that there is a direct link between a good working environment and productivity. MiniFrame's "Doing more with less" philosophy translates to a better work environment at your organization. No messy cables, no cumbersome hardware, SoftXpand solution not only provides more free space at the desk or at the cube, it also means less heat is generated so clean air is maintained and less noise enables better quality of work.
